RETAIL SALES | ONE-PAGE INSIGHTS

Sales Performance & Customer Insights • January 2024 – January 2026 • Synthetic Philippine retail data

Executive snapshot

₱4.46M	9,850	₱452.96	52,011
REVENUE	COMPLETED ORDERS	AVERAGE ORDER VALUE	ELIGIBLE UNITS

Key insights

- **Sales trend:** 2025 revenue was ₱2.12M versus ₱2.17M in 2024 (−2.44%), indicating modest year-over-year softening.
- **Category mix:** Toys (₱610,563; 13.68%) and Electronics (₱605,363; 13.57%) lead, but no known category exceeds 14% of revenue.
- **Product concentration:** The top 10 products generated ₱184,751, or just 4.14% of revenue; performance is spread across many products.
- **Geography:** Central Luzon leads at ₱776,432 (17.40%), followed by Central Visayas at ₱756,341.
- **Repeat purchasing:** Of 9,850 completed orders, 6,726 (68.3%) were subsequent observed orders and 3,124 were first observed orders; this is not a retention rate.
- **Customer spending:** Across 4,307 revenue-generating customers, median spend was ₱882 versus mean ₱1,036, suggesting right-skewed spending.
- **Order friction:** 1,235 orders were cancelled (8.23% of all orders) and 578 returned (3.85%); investigate causes before assuming recoverable revenue.

Priority recommendations

01 Introduce a monthly KPI review by category, region and first-versus-repeat observed orders; investigate the 2025 revenue decline before changing assortment.

02 Analyze cancellation and return reasons by product, fulfillment stage and month; prioritize improvements based on verified drivers and cost impact.

Methodology & caveats

Revenue = discounted merchandise value from completed, valid order-item rows; shipping and refunds excluded. Order counts are distinct orders. “New” means first observed order in this dataset, not first-ever purchase. Missing categories (₱14,676) and unknown region (₱14,300) remain in totals. Findings describe synthetic data and do not establish causation.
